

NEW Bermuda range

Introduction to Bermuda range

Material features and benefits:

Aesthetics: Bermuda is a painted MDF which provides the shutter with a more natural finish than the standard Antigua product and more closely resembles the finish of a hardwood shutter.

Hardwearing: Bermuda is still coated in a polypropylene sleeve which is very hardwearing but is now also paintable allowing us to offer a far wider range of painted colours. As Bermuda is manufactured utilising the polypropylene sleeve it is protected from changes in ambient temperature and this eliminates the risk of insitu moisture changes and the risk of warping and twisting.

Sustainability: All of our MDF is produced from managed plantation Radiata Pine forests that reach maturity in about 30 years. This MDF is viewed favourably as substitutes for tropical hardwoods which take close to 200 years to reach maturity. 70% of the MDF manufacturing energy requirements on site are for producing heat and as the plant generates almost all of its own heat requirement by burning wood residues this is very energy efficient. This is a form of bio fuel and is considered greenhouse gas neutral under the Kyoto protocol.

Frames, stiles, panels and louvres

Frames: All the frames that are available in the regular Bermuda programme are also available in Bermuda range

Stiles: Please note the stiles are manufactured in a beaded stile. The stile has a depth of 25.4mm and this narrow design means that remote control are not available in this material.

Louvres: Bermuda is available in 47mm, 64mm, 89mm, 114mm louvres. Due to the louvres being manufactured in ABS the panel weight of the shutter has been reduced. The means that single hung panels can now be up 915mm wide as of 64mm while multiple panels are available up to 610mm in width. NB the number of panels that can be hinged together remains a bi-fold. Over and above this the shutters must be tracked. Please see the panel limitations chart.

Special shapes: Linear special shapes are available.

Colour palette:

There are a total of 28 contemporary colours available and the swatch is the same swatch as your Sumtra swatch. The back 9 colours of the swatch are representations of popular Farrow and Ball colours. The code printed on the key ring corresponds to the F&B code i.e.

S:CRAFT	F&B
Matingley 267	Dovetail 267
Barnes 15	Bone 15
Stockbridge White 201	Shaded White 201
Worthy White 226	JOA's White 226
Popham 2013	Matchstick 2013
Candover White 2012	House White 2012
Winchester White 2010	James White 2010
Micheldever 208	Ringwold Ground 208
Wonston 203	Tallow 203

Panel Weights:

Louvre size	The weight per sq meter (KG)
63mm louvre	8.46
89mm louvre	8.23
