

NEW SUMATRA

Introduction to Sumatra

Sumatra is manufactured in FSC certified White Teak.

1) Material features and benefits:

S:CRAFT's white teak is of the finest quality timber and is of a beautiful silvery colour with tight grains and high dimensional stability making it an ideal wood for joinery and carpentry and this includes shutter production.

Sustainability: The new Sumatra range is manufactured from White Teak grown on the island of Kolombangara in the Solomon Islands which nurtures several protected forest as well as a plantation area of 14,330 hectares planted with mixed indigenous and exotic commercial wood species. This plantation has held FSC certification since 1998 (FSC certificate C028206). S:CRAFT as the UK operator distributing the product must also hold an FSC certificate and to our knowledge is the only UK distributor currently holding FSC certification for shutters.

2) Frames and panels:

Frames:

Large range of frames available.

3) Stiles:

Please note the stiles are manufactured in a beaded stile. The stile has a depth of 25.4mm, and engineered stiles are reinforced by using multiple layers of wood bonded together ensure that the panel does not twist or warp.

54) Louvres:

Sumatra is available in 32, 47mm, 64mm, 89mm, 114mm elliptical louvres and in 60 and 84mm flat louvres.

5) Special Shapes:

Linear and curved special shapes are available.

6) Colour palette:

There are a total of 28 contemporary colours available and the swatch is the same swatch as your Bali/LarchWood/BassWood swatch.

A choice of 20 stains is also available.

The back 9 colours of the paint swatch are representations of popular Farrow and Ball colours. The code printed on the key ring corresponds to the F&B code i.e.

S:CRAFT =	F&B
Matingley 267 =	Dovetail 267
Barnes 15 =	Bone 15
Stockbridge White 201 =	Shaded White 201
Worthy White 226 =	JOA's White 226
Popham 2013 =	Matchstick 2013
Candover White 2012 =	House White 2012
Winchester White 2010 =	James's White 2010
Micheldever 208 =	Ringwold Ground 208
Wonston 203 =	Tallow 203

Panel limitations:

Louvre Size	Width				Height				
	Minimum	Maximum			Maximum number of untracked Multi-fold panels	Minimum	Minimum when used with Remote Control tilt	Maximum without mid rail	Maximum with mid rail
		Single hung	Bi-fold hinged shutter/ Multi-fold with Top and Bottom track	Multi-fold hinged shutters & multi-fold with Top track only. Number of panels ≥ 4
